

I want to keep the VRS to serve for the DEAF and Hard of Hearing with TDD Relay, Video Relay, and Internet Relay . It helps all People in DEAF community to access the services to anyone in the world. Without the relay services, we are kept in silence and we have not way to connect to families, friends , businesses , health services, and employment services , many other companies , stores, etc . We need the VRS services to reach them. Help the people with disabilities first instead of sending thousand of dollars to other countries who don't care about USA.  
Thank you
